

PART I—SECTION 1**Notifications relating to Non-Statutory Rules, Regulations, Orders and Resolutions issued by the Ministries of the Government of India (other than the Ministry of Defence) and by the Supreme Court****MINISTRY OF COMMUNITY DEVELOPMENT AND COOPERATION***New Delhi, the 17th August 1964*

No. 11-64/64-Coord.—The building up of a strong cooperative sector is a primary objective of national policy. In pursuance of this policy, Government have been promoting the growth of the cooperative movement through various measures such as participation in share capital, outright grants, subsidies, concessional loans and technical assistance. Advantage of these facilities has, however, been taken in many instances by societies which are not genuinely cooperative in character, e.g. cooperative farming societies or transport cooperatives organised by members of a family or a few entrepreneurs. Similarly there have been instances where the real purpose of cooperative institutions has been sought to be undermined by groups of persons, managing to perpetuate themselves as office bearers and exploiting their position for personal, sectional or group advantage. Partly because of these factors and partly because of increasing dependence of the cooperative institutions on external support, the movement has suffered in its growth towards self-reliance and self-regulation. These shortcomings should be overcome and safeguards provided, if Cooperation is to play its vital role in the development of the country's economy. The Government of India have accordingly decided to set up a Committee to examine comprehensively the various issues involved and to make suitable recommendations.

2. The following will be the terms of reference of the Committee :—

- (a) To lay down standards and criteria by which the genuineness of cooperative societies of various types may be judged and to suggest measures for weeding out non-genuine societies and preventing their registration in future;
- (b) To review the existing cooperative laws, rules and practices with a view to locating the loopholes which enable vested interests to entrench themselves in cooperative institutions and to recommend measures—legislative as well as administrative—for the elimination and prevention of such vested interests.
- (c) To examine the factors inhibiting self-reliance and self-regulation in the cooperative movement and to suggest appropriate remedies.
